TESTIMONIES

I chose MSM because I want to learn Management in Science to understand the deeper knowledge about Management. Also, MSM has the good curriculum that focus on research. It provides their students to learn both theories and practical in management that supported by the best lecturers that gives students new knowledge and insight.

**Niken Larasati, MSM**  
Research Assistant, PT Telekomunikasi Indonesia Tbk

I decided to go to MSM ITB because of many reasons: an awesome learning experience, low cost, industry practitioner instructors and the possibility to improve my ability to do research. Furthermore, I desire to become a lecturer, so I feel MSM ITB is the right choice.

**Yessie Fransiska Lydiana, MSM**  
HR Business Partner PT Bank Danamon Indonesia, Tbk.

I execute business directions based on research results and use all parameters and literature review from research as the main reference for company decision-making. Highlighting the action research as the strength of DSM program, the method helps me combine theory with the real practice. So, we can execute the professional working framework based on the academic theory. In academic area, I look forward to sharing my knowledge through various seminars and lectures in universities.

**Dr. G.N. Sandhy Widyasthana**  
Portfolio Director, Metra Digital Innovation

She business landscape is changing, often at a lightning speed. Competition forces companies not to depend solely on innovation of products. Principal aspects of the company, if not all, such as network, activity systems, marketing, and distribution, must be refined. It is the business model that must be innovated.

**Dr. Dina Dellyana, S. Farm., Apt., MBA**  
Director, Business Incubator of SBM ITB, Lecturer SBM ITB, Owner Glintz Shoes

MSM – FULL-TIME

Master of Management Science is a well-designed program offered by the best research university in Indonesia to develop students' analytical and research skills. The structured course provides students with the knowledge and skills to investigate real world problems from theoretical perspectives and empirical methods. Students will also be able to understand and critically think how to be an analyst and a researcher that can lead and manage a business through the practical implications of their research. Students are motivated to solve not only management problems but also other aspects such as social, ethical, and environmental issues that may impact the business especially in the context of Indonesia.

WHY MSM?

- Develop research skills for excellent career
- Building deep theoretical and analytical skills
- Open for fresh graduate from various background
- Working with world-class faculty members
- International exposure opportunities (visiting professor, guest lectures, international colloquium, summer program, student exchange)
- Double Degree Programs with scholarship (tuition fees waiver and/or stipend)
- Opportunity to join research collaboration with Government/Research Institutions/Industry
- MSM-DSM Fast Track Program (four-year program)

DSM – Bandung & Jakarta Campuses

Doctor of Management Science is a well-designed program offered by the best research university in Indonesia to develop not only students' analytical and research skills but also the ability to contribute significantly to the development of knowledge. The structured course provides students with the philosophical foundation of business and management to be able to think conceptually, synthesize theories, understand the state-of-the-art of the specific area in business and management, and thus capable of making recommendations for future research that will contribute significantly to the literature. Our prominent professors with their expertise will encourage intellectual discovery and development. They also will challenge students to develop new insights from the real case of Indonesia context with diverse culture and unique situation. Our graduates have developed career and being promoted not only in academic institutions but also in other research institutions such as policy makers, research centers, and business analysts/consultancy.

WHY DSM?

- Pursue novelties that have significant contributions to the literature, government, business, and society
- Supervised by prominent professors in Indonesia
- Structured publication pipeline
- Scholarship opportunities for up to 6 students (for DSM Bandung)
- Offer advanced courses
- Provide academic writing workshops
- Conducive research atmosphere
- Excellent scholars for successful academic or advanced professional career
- Combine course work and independent learning for publication outputs
